

Daraz Support Assistant

Ask about returns, delivery, refunds, seller policies, payments & customer support

How do I return a defective item?

How to return a defective item (Returns Department)

1. **Check the return window** – Most items can be returned within 7 days of delivery (electronics & appliances only for manufacturing defects). Make sure you're still inside this period.
2. **Gather your order details** – Have the order ID (proof of purchase) ready.
3. **Start the return in the app/website**
 - Go to 'My Orders'.
 - Select the defective item.
 - Click 'Return / Refund'

What is the return window for electronics?

The return window for electronics (and appliances) is **7 days** from delivery, and it applies only to manufacturing defects—not to change-of-mind returns.

Can I track my order?

Yes! You can track your order in real-time:

1. Go to **My Orders** in the app/website.
2. Tap **Track Order** – you'll see the current courier checkpoint (e.g., Order Confirmed, Packed, Shipped, Out for Delivery, Delivered).

If the delivery goes past the estimated window, you can contact Customer Support for an update or a possible compensation voucher.

How long does a refund take to process?

A refund's processing time depends on the method you choose:

- **Daraz Wallet credit:** usually 24–48 hours after the refund is approved.
- **Credit/Debit-card refund:** 5–10 business days, subject to the issuing bank's processing time.
- **Bank-transfer refund:** 3–7 business days after approval.

The overall speed also hinges on how quickly the returned item is received and inspected, as well as any bank-related delays or incomplete bank details. If you don't see the refund within these windows, check the status under **My Orders > Returns & Refunds** and contact Customer Support with your order ID and refund reference number.
